Dear Ron:

Thank you for visiting with me on November 25, 1983. Our discussion gave me a much better understanding of the Pueblo's needs.

I would like to reemphasize a few points that may become critical to the Pueblo's decisions on the Jackpile-Paguate Project.

Jacobs is prepared to make a long-term commitment to the Pueblo. Our Albuquerque Office is growing and is a regional center. Our contract to reclaim 24 uranium mill sites will last a minimum of an additional six years and our other contracts have made this a permanent office location for Jacobs. Therefore, this office will always have people committed to the Jackpile Project full time and will also have the specialists needed on a part-time basis readily available at all times. The close proximity of a wide range of specialists may be very important to providing effective support to the Pueblo over the entire duration of the Project.

Jacobs experienced reclamation staff is located in Albuquerque and will remain here as long as there is mine reclamation work to be done. Our Albuquerque staff consists of mining engineers, civil engineers, hydrologists, revegetation specialists, health physicists, project managers, permitting specialists and other technical specialists.

Jacobs is a goal oriented company. If selected by the Pueblo, we will cut through the project's political and technical complexities and provide the analysis and information that the Pueblo needs to make sound decisions. Jacobs approaches projects based on what it will take to accomplish the goal and then applies performance and schedule controls to assure completion on time and within budget.

Lastly, you have my personal commitment to work within Jacobs to assure that our commitment to the Pueblo remains strong throughout the Project. I will insure that Jacobs' most experienced and effective personnel are

assigned to the Project and that the maximum effort is put into each phase of the Project. Having a voice for the Pueblo within Jacobs is a very great asset. Jacobs is prepared to commit me full time (as needed) to provide the coordination and information that our experienced engineers and project managers will need to complete the project.

We look forward to responding to the Pueblo's RFP. Please contact me if I can assist you in any way.

Very truly yours,
JACOBS ENGINEERING GROUP INC.

Marc E. Nelson
